Figure 7A to FER-177: Recently-active traces of the Lenwood fault, and traces recommended for zoning. Traces in black are from Morton and others (1980), locally modified where necessary. Traces in green are from Manson (Figure 4, this report). All traces are recommended for zoning, unless otherwise noted.

Fault: Solid line where accurately located; long dash where approximately located; short dash where inferred; dotted where concealed; queried where uncertain.
