Earthquake Zones of Required Investigation
Plaster City Quadrangle

California Geological Survey

This Map Shows Alquist-Priolo Earthquake Fault Zones.
Seismic Hazard Zones Have Not Been Prepared For The Plaster City Quadrangle.

**MAP EXPLANATION**

**EARTHQUAKE FAULT ZONES**

- **Earthquake Fault Zones.** Effectively delineated trace and associated area using methodology designed and developed by the California Geologic Survey. Generation of this map was funded by the California Natural Resources Agency, Office of the Governor, Division of Mines and Geology, through the California Geologic Survey. The data used to prepare the map is from the California Geologic Survey, California Department of Conservation, Division of Mines and Geology, Special Publication 118, Division of Mines and Geology, Special Publication 117A, and Special Publication 119, Division of Mines and Geology. Information regarding the scope and recommended methods to be used in preparing regional site investigation reports is in Special Publication 62, Guidelines for Preparing Site Investigation Reports. These guidelines are also available online.

**ADDITONAL INFORMATION**

- The identification and location of liquefaction, landsliding, strong earthquake ground shaking or other earthquake and geologic hazards. Also, a delineation of areas zoned.

**EXCEPTIONS:**

- Seismic Hazard Zones identified on this map may include developed land where delineated hazards have been determined to be a significant risk. These areas are also a recommendation for development control and are an expression of the California Earthquake Fault Zones Program.

**PLASTER CITY QUADRANGLE**

**EARTHQUAKE FAULT ZONES**

- Delivered in compliance with Chapter 7.5
- Division 2 of the California Public Resources Code
- (Alquist-Priolo Earthquake Fault Zoning Act)

**OFFICIAL MAP**
