MAP EXPLANATION

Faults considered to have been active during Holocene time; solid line where accurately located, long dash where approximately located, short dash where inferred, dotted where concealed; query indicates additional uncertainty.

SOURCE OF FAULT TRACES

- Bryant & Hart (supplement to FER-137)
- Bryant (this report)
- Herd (in press)

Figure 4 (to FER-137). Faults, based on Herd (in press), in the Jericho Valley and Knoxville quadrangles recommended for zoning for special studies.
