
EXPLANATION

Contacts, dashed where approximately located (± 3 cm) dotted where gradational (±10 cm) queried where unclear or inferred

⊕ Approximate location of detrital charcoal collected for C-14 dating, sample S-15-1-1-2

Not all clasts have been shown on log. Only the largest clasts and those significant to the interpretation of geologic structure have been shown.

Colors are on dry material using Munsell color system.

For location of trench see fig. 3-2, 3-3, and plate 1B.
