
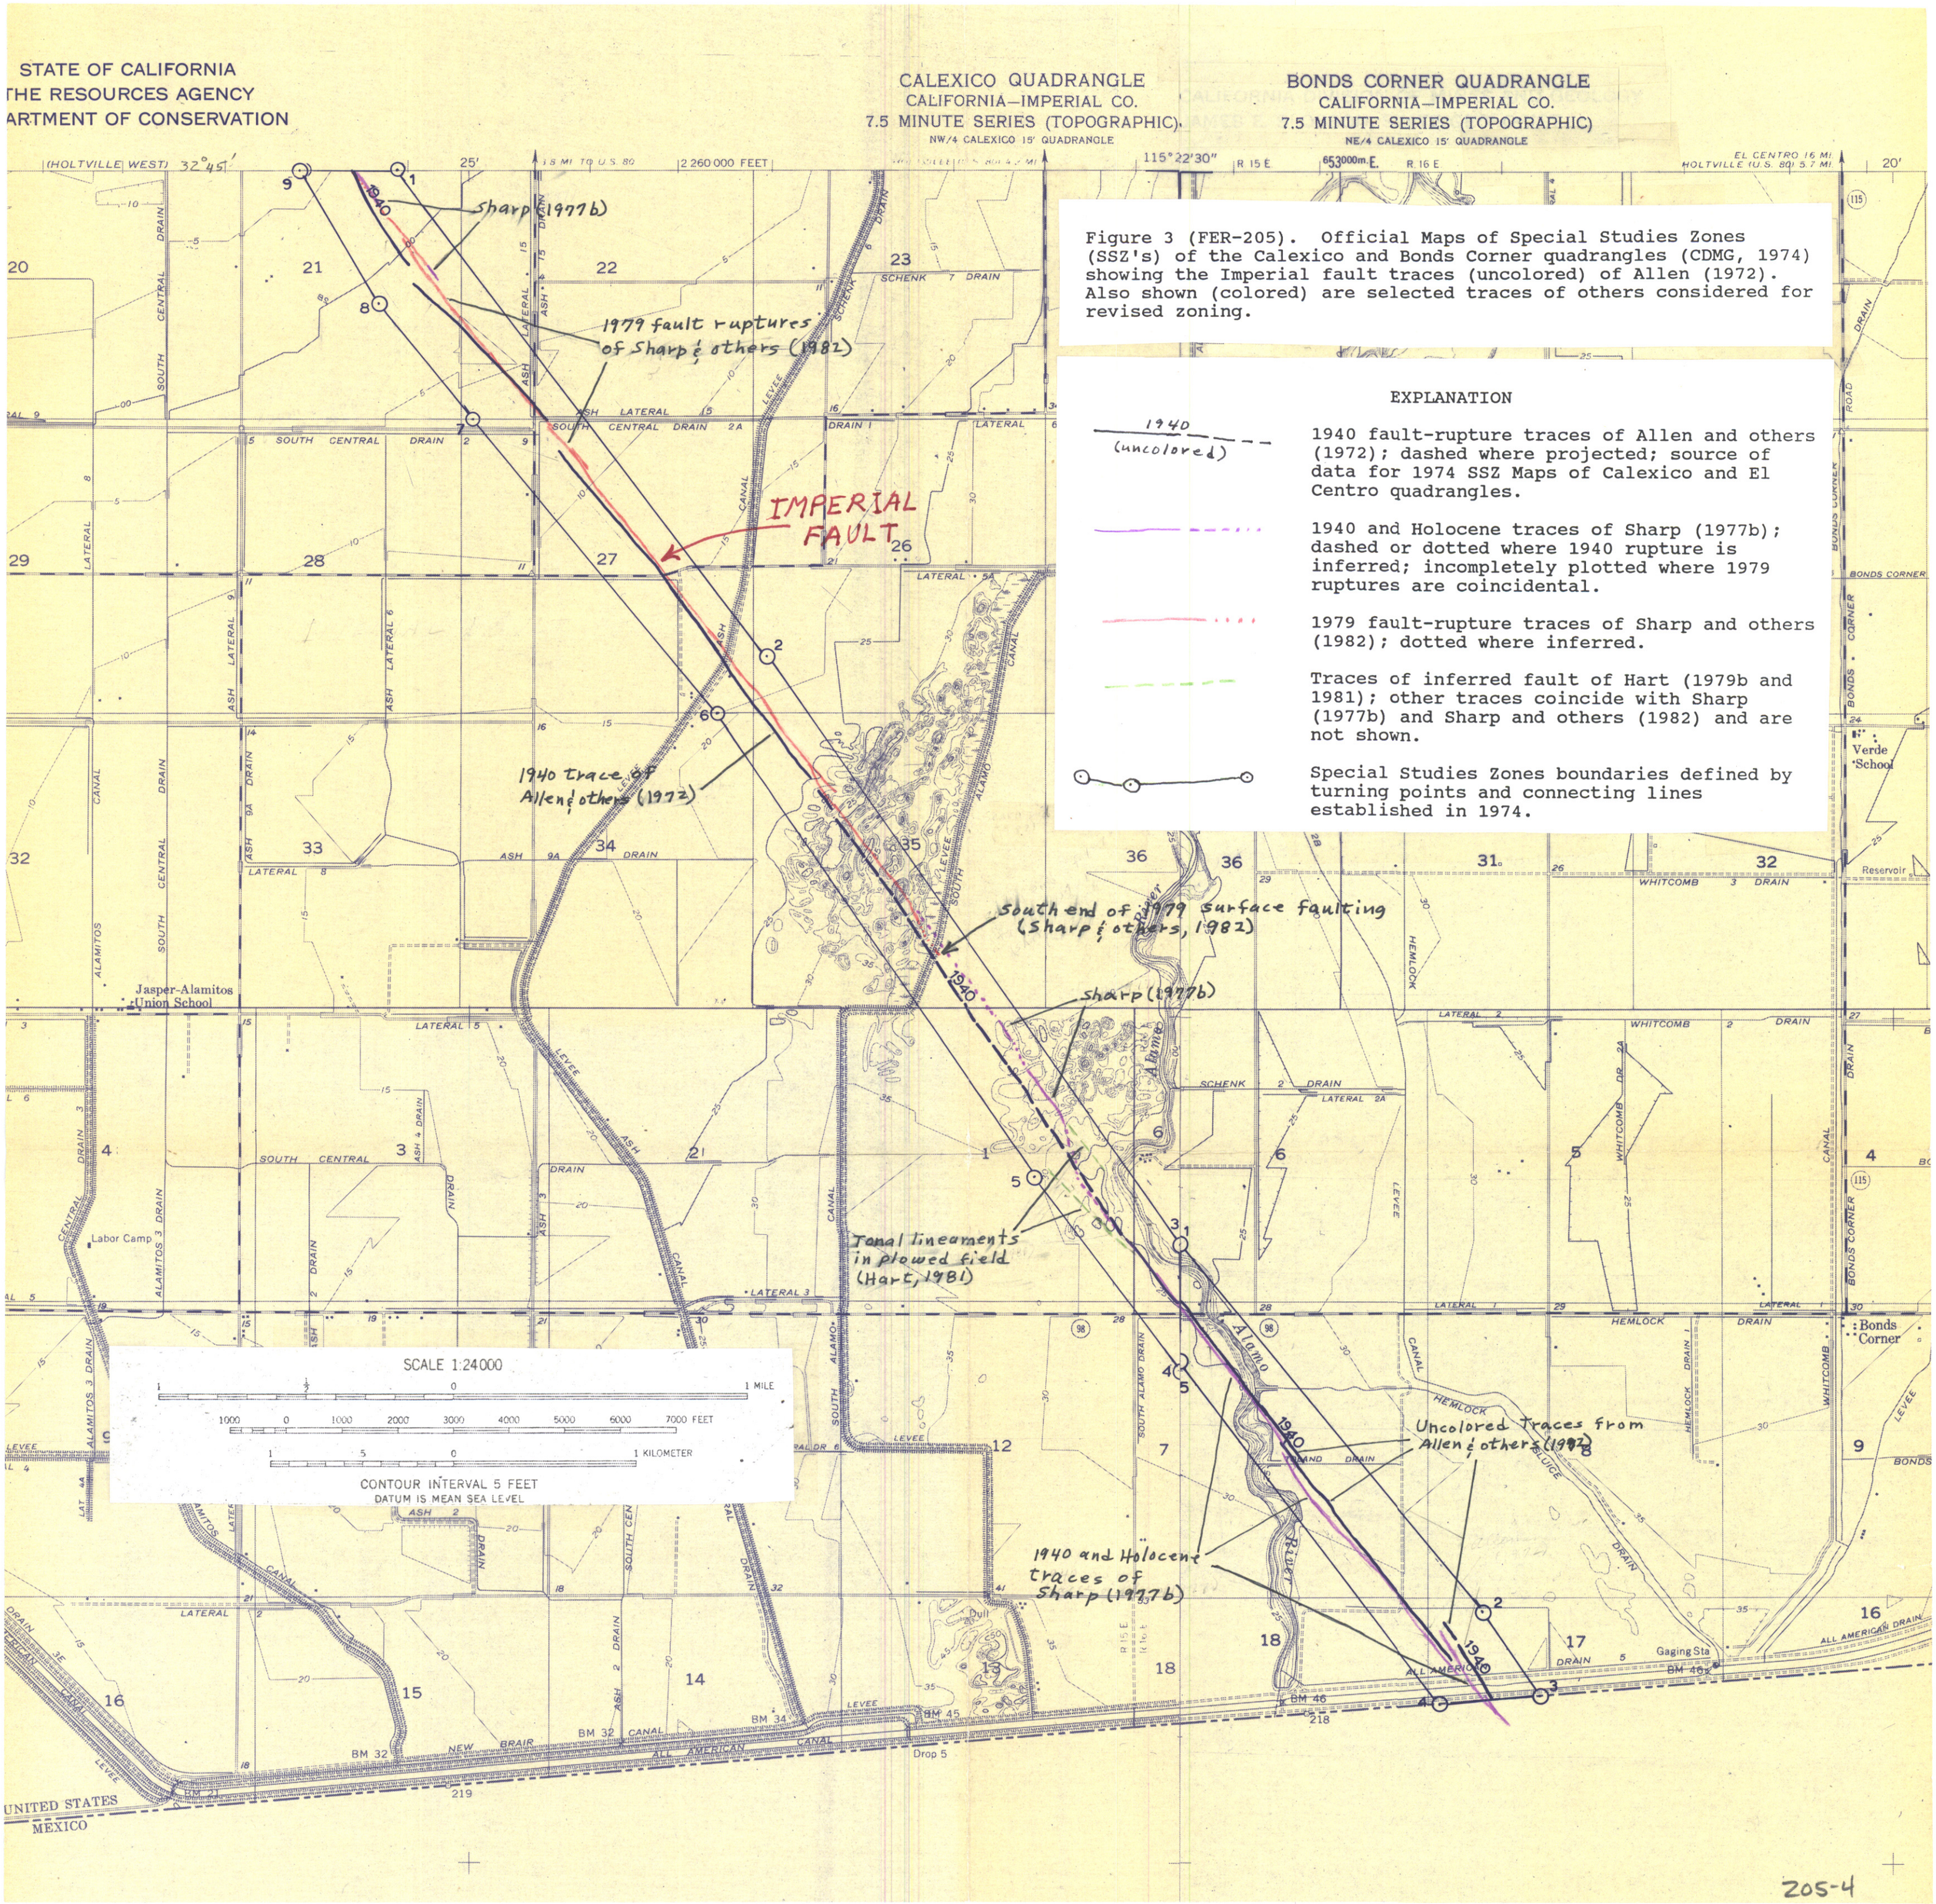

Figure 3 (FER-205). Official Maps of Special Studies Zones (SSZ's) of the Calexico and Bonds Corner quadrangles (CDMG, 1974) showing the Imperial fault traces (uncolored) of Allen (1972). Also shown (colored) are selected traces of others considered for revised zoning.

EXPLANATION

1940 (uncolored) — 1940 fault-rupture traces of Allen and others (1972); dashed where projected; source of data for 1974 SSZ Maps of Calexico and El Centro quadrangles.

1940 and Holocene traces of Sharp (1977b); dashed or dotted where 1940 rupture is inferred; incompletely plotted where 1979 ruptures are coincidental.

1979 fault-rupture traces of Sharp and others (1982); dotted where inferred.

Traces of inferred fault of Hart (1979b and 1981); other traces coincide with Sharp (1977b) and Sharp and others (1982) and are not shown.

Special Studies Zones boundaries defined by turning points and connecting lines established in 1974.
